Prepared by:	Grant Henderson
Date:	21 June 2023
Time:	
CM ref:	23/41465

This file note documents changes in the latest release of TasWater’s Supplement to Water Supply Code of Australia WSA 03 – 2011-3.1 MRWA Edition V2.0 (the Code), release – Public 05.

Amendments by Section:

- 2.2.2 (b) – Minor change to wording
- 2.3.1 Removal of Probable Simultaneous Demand (PSD) for service zones less than 100ET
- 2.3.4.1 – Minor change to wording
- 2.4 – Section removed, duplication of Code requirement
- 2.5.3 – Greater definition of allowable service pressures
- 2.8.1 – Minor change to wording
- 3.1.2 – Clarification of instances where reduced sized duplicate mains are acceptable
- 3.1.5 – Minor update to reflect Tasmanian Planning Scheme zonings
- 3.1.6.3 – Update to roughness factors consistent with Hydraulic Modelling Guidelines
- 4.1 – Changes to Reference TasWater product list rather than City West Water (Greater Western Water) and TasWater materials preferences for water mains
- 5.2.4 – Removal of content, see 3.1.2
- 5.11 – Update to meter locations, inclusion of ownership definition for properties where meters are not accessible and property connection requirements
 - 5.11.2 – Additional clarification
 - 5.11.3 – Added reference to TW Property Service Drawings
- 5.12.5.2 – Additional clarification of required electrical clearances
- 7.4.4 – Specification of preferred embedment
- 8.2 – Inclusion of Burnie in requirement for Anti-clockwise closing valves
- 8.3.3 – Reference to TasWater PRV requirements
- 8.8.4 – Minor change to wording

12.1 – Changes to Reference TasWater product list rather than City West Water (Greater Western Water)

13.4 – Minor change to wording

14 – Section removed

16.1 – Relaxation of need for cement stabilised embedment to >10%

16.3.1 – Minor change to wording

22 – Minor change to wording

22.3 – Minor change to wording

25 – Reference to TW Property Service Drawings added

26 – Updates to Drawing Titles, References and Comments

Appendix B – Inclusion of requirement 19

Change Log – Updated

Note: The 300 Series Drawings provided by MRWA in conjunction with TasWater’s supplement drawings relating to valve installation and marking will be updated in a further revision.
