Title: Release Notes – Supplement to Gravity Sewerage Code of Australia WSA 02 – 2014-3.1 MRWA Edition V2.0
Site/location: Statewide
Prepared by: Jie Khor
Date: 13 October 2023
CM ref:

This file note documents changes in the latest release of TasWater’s Supplement to Gravity Sewerage Code of Australia WSA 02 – 2014-3.1 MRWA Edition V2.0 (the Code), TasWater Build Version 2.1.

Amendments by Section:

Part 1

5.5.4 – Minor change to wording on Table 5.5 to align with the requirements specified on MRWA-S-105, Table 105-C.

7.6.2 – Minor change to wording to reflect the relaxation of acceptance for Maintenance Hole’s alternative materials, such as PE or other plastic materials.

9.4.4 - Relaxation of need for cement stabilised embedment to >1 in 10

21.11 – Minor change to wording to reflect the requirements of the latest edition of WSA 05-2020 V4.1 to be adopted by TasWater (Feb 2024).

Part 2

13.1 – Changes to Reference TasWater product list rather than City West Water (now Greater Western Water).

Appendix B – Minor changes to Table B1. This is to align with the approved TasWater’s Price and Service Plan and provide consistency against our billing rates.

Appendix C (C2) – Correction to ADWF and PDWF formula. This correction is aligned with a technical addendum issued by TasWater.

Appendix C (C4) – Clarification on the requirements of ARI required for the calculation of Rainfall Intensity and Factor_{containment}

Part 4

4.1 – Clarification on the version of the Sewerage Standard Drawings currently adopted by TasWater. This clarification is aligned with a notification issued in year 2021 by TasWater.
