

Objective

To ensure we manage our assets to deliver customer value, achieve operational efficiencies, protect the environment, and maintain resilience, *through* evidence-based, risk-managed approaches aligned with regulatory compliance and best practice.

Scope

This Policy applies to all TasWater asset infrastructure and related systems, that facilitate the provision of water, wastewater, and recycled water services to the people of Tasmania.

Policy Commitments

- We will develop and implement, an asset management system (AMS), endorsed by our Executive Management, with accountability assigned to an Executive Manager.
- We are committed to a management systems approach in developing and implementing our AMS, aligned to the ISO55000 series of international asset management standards.
- We are committed to continually improve our AMS, ensuring the right people capabilities, and supporting systems are in place.

Responsibilities

The Chief Executive Officer is responsible for implementation of this Asset Management Policy.

The General Manager Sustainable Infrastructure Services is the owner of the AMS and is responsible for reporting to Executive Management and the Board on asset management performance.
