Water restored following Show Day outage

Large areas of West, South and Central Launceston as well as areas of Prospect and Kings Meadows which have been impacted by a water outage today are now seeing their water supply being fully restored.

The cause was a pump failure at the Lower Brougham Street pump station which was repaired earlier today and reservoirs serving the impacted parts of the city replenished.

Customers may notice that with the return of the supply their water may be discoloured or cloudy.

We advise customers to run a tap, preferably an outside tap for several minutes until the water runs clear.

Pressure, especially in more elevated parts, may be low at first but will return to normal as the afternoon progresses and its anticipated supply will be fully restored by this evening.

TasWater apologises for the inconvenience and thanks customers for their patience.

Further updates can be found on our website www.taswater.com.au or on Facebook.

If you continue to have problems with your water please call 136992.
